

**RELEASE AND WAIVER FOR DYNAMOMETER TESTING**

I understand that the dynamometer is designed to simultaneously measure the torque and rotational speed (RPMs) of an engine or motor to determine the power produced. To accurately determine the power, the engine or motor is pushed to maximum output. All Mueller Motorwerks, LLC staff operating the dynamometer have been trained in the proper operation, but whenever an engine or motor is operating at maximum output, there is a risk of damage, which may result in the total destruction of the engine, its components and other related damages. I understand that there are risks associated with running my engine or motor at maximum output.

I understand that modifications to the original manufacturer specifications may place my engine or motor at increased risk of damage from use of the dynamometer. I am aware of the following modifications to my engine or motor:

Part Description	Manufacturer

Having read the foregoing, I hereby authorize Mueller Motorwerks, LLC to connect the following vehicle to the dynamometer for testing:

Make:
Model:
Year:
VIN:

**By signing this Release and Waiver for Dynamometer Testing, as the owner of the above vehicle, I agree to release, hold harmless and indemnify Mueller Motorwerks, LLC, its owners, agents, and employees, from any and all liability for damage to my engine, motor, vehicle parts or components, or other personal property arising from the connection to and use of the dynamometer.**
